

Candidate evidence

2 Introduction

2(a) A clear statement of the aim(s) together with relevant hypotheses

Example 1

To determine how caffeine affects heart rate in *Daphnia*.

Example 2

The aim of this investigation is to test the effect of salt concentration on the proportion of brine shrimp cysts that hatch.

Example 3

To investigate the level of the protease actinidin in kiwi fruits at different stages of ripeness.

Example 4

To find out if light intensity affects photosynthesis in *Scenedesmus*.
