

Candidate evidence

1 Aim

Example 1

Aim: to investigate which vegetable sources contain the most catalase.

Example 2

Aim: To investigate the activity of catalase in different tissues.

Example 3

To see how pH affects how well enzymes work

Example 4

Aim- To investigate the effect of pH on enzyme action.

Example 5

Aim: To investigate how increasing the temperature affects fermentation in yeast cells.

Example 6

The aim
Is to investigate the effect of temperature on the activity of the enzyme lipase.
