

# Commentary on candidate 2

## Description of new skills and knowledge

The candidate was awarded **3 marks** because they gave a detailed description of research carried out and the application of new knowledge and skills that goes beyond what is required for the Advanced Higher course.

The research into server-side validation is, however, incomplete. The candidate has acquired some knowledge about server-side validation but this knowledge is limited. The candidate could have attempted to either redirect valid input to a separate page for continued processing or reloaded the current page when invalid data was received. For this reason the research evidence is almost complete.

**Total marks awarded - 3**
