ENTER NUMBER OF QUESTION		DO NOT WRITE IN THIS MARGIN
b)	one benefit of using a crease resistant finish for	
	the items in the collection is that they won't	
	become crushed if they are put in a suitcase	
	and taken on holiday where an iron may not be	
	available.	
	Another benefit of applying a crease resistant finish	
	to the items in the collection is they will	
	look smart on the wearer straight from the	
	suitcase when they arrive at their holiday	
	spot.	
c)	using Social Media to promote the collection	
	is good for the collection as it will reach a	
	large audience of people thus it will gain	
	popularity and it will sell.	

ENTER NUMBER OF QUESTION	DO NOT WRITE IN THIS MARGIN
cotton is a very breathable fibre, this is good for the	
uniform as the staff wearing them will be moving around	
a lot this meaning they won't be uncomfortable at work.	
cotton has a soft handle, this is good for the	
uniform as the staff will be wearing the	
uniforms for long shifts meaning they will be	
comfortable while at work.	
<u>polyester</u>	
polyester is a very strong fibre, this is good for	
the uniform because it will need to be washed a lot	
meaning it won't need to be replaced often.	
polyester is a very absorbent fibre, this is good for	
the uniforms as they will most likely have things	
spilled on them throughout the day and it won't stay	
wet meaning they won't be uncomfortable.	

ENTER NUMBER OF QUESTION	DO NOT WRITE IN THIS MARGIN

construction techniques

The uniform has set in sleeves this is good because the staff wearing the uniform will have a greater range of motion meaning they won't be uncomfortable at work.

The uniform has shaped patch pockets, this is good for the uniform because it means the pockets are sturdy meaning they will last a long time and provide easy access to the medical equipment they may need.

The uniform has an exposed zip, this is good for the uniform because it will be easy to take on and off ~~so~~ meaning that they can easily change if the uniform gets dirty.

ENTER NUMBER OF QUESTION	DO NOT WRITE IN THIS MARGIN
	Another ^{benefit of} reason using using a bespoke service is
	the dress will be exactly how the client envisioned it.
b)	Silk has a very good drape, this will be good for
	the dress as it means the dress will hang nicely
	on the client meaning they will look smart when
	wearing it.
	Silk has a very soft handle, this would be good
	for the dress as it means the client will be comfortable
	but still look elegant.
	Silk is very cool to wear, this is good as it
	means when the client is at the prom they won't
	be too hot and uncomfortable.
	Silk is very delicate, this would not be good for
	the dress as if the client were to catch the dress
	it would very easily rip rip ^{meaning} it would be ruined.

ENTER NUMBER OF QUESTION	DO NOT WRITE IN THIS MARGIN
	c) fabric requirements are important because if the fabric the person has is not enough as specified they won't be able to complete the item.
	the back view is important as the person making the garment has to have an idea of what it will look like when it is completed as to make it correctly.
	requirements/notations are very as the person creating the garment has to know what tools and tools ^{embellish.} ments are required to produce the item.
4.	
	a) One principle of design that would have to be considered when creating the track top is cost, this would need to be considered as the tops are

ENTER NUMBER OF QUESTION	DO NOT WRITE IN THIS MARGIN
	for kids meaning how much the parents are willing to pay for the item matters greatly to the production.
	Another principle of design that would have to be considered is aesthetics, this would have to be considered as if the top doesn't look cool the child won't want to wear it rendering it pointless.
	Finally the last principle of design that would have to be considered is quality, the top will have to be soft otherwise the child will complain about wearing it.
	b) one method of embellishment that would be suitable for the children's top is an embroidered logo.
	This would be suitable for the top because it will be able to accurately present the club's logo and show which team the kids are playing for.

	<p>get crushed easily. This isn't suitable as it means it will look less smart and scruffy for work.</p>
	<p><u>Princess Seams</u></p>
	<p>> One construction technique used in the manufacturing of the uniform would be the princess seams. This is when the fabric is stitched almost 'put right' on the front but then makes the garment look neater and smarter to wear.</p>
	<p><u>Sleeves</u></p>
	<p>> Another construction technique used in the manufacturing of the uniform would be the sleeves. This is when you match the patches so that the sleeves can hang correctly. The</p>

ENTER NUMBER OF QUESTION	DO NOT WRITE IN THIS MARGIN
	garment should look neater and hang correctly with them.
24	
	<u>Patch Pocket</u>
	> Another construction technique used in the manufacturing of the uniform is a patch pocket. This is positioned on the right hand side of the garment at the top, the pocket should be secure and sturdy.
	<u>Zip</u>
	> Another construction technique used in the manufacturing of the uniform is the zip, this has been stitched so the stitching is even at both sides making the garment wearable and stronger.

ENTER NUMBER OF QUESTION	DO NOT WRITE IN THIS MARGIN
3a.	One benefit of using bespoke service to create the prom outfit would be because it's made especially for the wearer. Therefore no one else would have it and it would fit you personally.
	Another benefit of using bespoke service to create the prom outfit would be because you can choose how you like it, it would be suited to fit you.
	Another benefit of using bespoke service to create the prom outfit would be because they're durable the prom outfit would last a long time and wouldn't wear or tear when being worn, therefore the dress could be worn again.

ENTER NUMBER OF QUESTION	DO NOT WRITE IN THIS MARGIN
3b.	Silk would be suitable for the prom outfit as it drapes well. This is good because it would have an elegant look to the outfit and would make the prom outfit smarter and elegant.
	Silk would not be suitable for the prom outfit as it is creases easily. This is bad as it means the dress ^{outfit} would need to be ironed and kept neatly somewhere so it doesn't crease. *Prom outfit
	Silk would be suitable for the prom outfit as it is soft and comfortable to wear. This is good because it means the fabric won't be itchy or cause irritation for the wearer ^{to} on the night. *to wear the prom outfit

ENTER NUMBER OF QUESTION	DO NOT WRITE IN THIS MARGIN
	<p>Silk would be suitable for the prom outfit as its cool. This is good because it means that when your dancing you wont get hot or sweaty and will still be away to dance. *Your prom outfit</p>
3c.	<p>Fabric requirements is important on a commercial pattern because it shows you what fabric would work best with the garment and how what it would look better with. So you can order the correct fabric.</p>
	<p>Back view is important on a commercial pattern because it shows you what the garment would look like from behind and if you would still want to make it as the back could have something</p>

ENTER NUMBER OF QUESTION	DO NOT WRITE IN THIS MARGIN

Strange that you may not line.

- Requirements/ notions is important on a commercial pattern as it shows you what extra pieces you would need to buy i.e- zips, buttons etc, so you can make and complete the item properly.

Ans. One principle of design that you would need to consider when developing a childrens track top would be ~~the~~ safety. This is because you wouldn't be able to have any small beads or embellishments that a child could choke on.

Another principle of design that you would need to consider when developing a childrens track top.

ENTER NUMBER OF QUESTION	DO NOT WRITE IN THIS MARGIN

Would be quality. The top would need to be of good quality so that the top doesn't wear or tear when running the track.

Another principle of design you would need to consider would be durability. This would be because the top needs to last a long time so that the child can wear it ~~again~~ again and again.

Another principle of design you would need to consider would be ease of care. This is because the top needs to be able to be machine washed so that the child can wear it again when clean.

ENTER NUMBER OF QUESTION	DO NOT WRITE IN THIS MARGIN
4b.	One method of embellishment would be for the children's track top would be embroidery.
	One reason this method would be suitable would be because it wouldn't fall off or the child wouldn't be able to play with it therefore reducing the risk of the child choking on it.
	Another reason why this method would be suitable would be because it could represent the team their playing for so it could have / give meaning to the top.
	Another reason why this method would be suitable would be because

ENTER NUMBER OF QUESTION	DO NOT WRITE IN THIS MARGIN
	it can be machine washed without
	it falling off. Embroidery is durable
	and the design or logo wouldn't
	rip or come off in the wash.
	Therefore making the top strong and
	sturdy
