

## Candidate 3 evidence

In this blog I would want to discuss 'How to get on with your neighbours'.

The qualities of a good neighbour would be that he is respectful and wants to get a long with the new community he moved into. Moreover a good neighbour is the one that does not party every weekend and blasts music whenever he is in the property. 60

It is important when moving into a new area you get a long with the neighbours. Since they have been a part of the community you moving in<sup>to</sup> and don't want to feel like you don't know anyone ~~to~~ when you move in. Also if you don't get a long with your neighbours that can make you feel isolated in the community.

~~Meeting~~ Therefore meeting new neighbours and building relationships will be important for how you fit into the community. Also if you don't build new friendships in the area you moving you may feel isolated and that could effect your mental health. If you're isolated and feel like you got no one to talk to in your area can make you feel down and not really liking the place you live at.

Neighbour groups would be perfect to go to just before moving in so you all ready will know people from your new community.
