1)	<p>The conclusion I have reached about the minimum unit pricing and consumption by socio-economic group is the number of socio-economic groups drinking alcohol is increasing. Source A says 60.5% of the Scottish population are moderate drinkers. This shows that the number of moderate drinkers has increased. *</p>
	<p>The conclusion I have reached about the minimum unit pricing and crime rates is the most amount of crimes committed was were because of a high consumption of alcohol. Source A says "60% of young offenders were drunk at the time of their offence". This is further supported in source B which shows a number of alcohol</p>

related violent crimes started to decrease over time from just over 180,000 to just over 160,000. This shows that Minimum unit pricing is leading to crimes from taking place.

This is backed up by source A which says 'MUP may actually be causing a rise in crime'. This overall shows that MUP is leading to the crime rates increasing as source A says 'supermarkets have reported an increase in the theft of strong alcohol'; this is due to the fact that people cannot afford to purchase alcohol at ^a new price and as a result ends in stealing.

The conclusion I have reached about minimum unit pricing and health is ~~the amount of alcohol~~ health in Scotland is improving slightly. Source B shows alcohol related hospital admissions

in 2013 were low however started to increase to 14,000 in 2017. However, it is expected that by 2023 hospital admissions will have decreased to stand at just over 8,000. This is backed up in source A which says 'as binge drinking is a major cause of hospitalisation, it is hoped alcohol related ill health will be reduced.'

This shows that MUP is improving the health of people in Scotland. This overall, shows, that MUP will reduce the amount of ill health due to alcohol as source B shows it will continue to decrease from now until 2023.

Overall, people's drinking habits will not have changed due to MUP. Source A shows the effect MUP had on alcohol consumption level showing that

	<p>63% 21% of people will drink less however, 63% will have no change. Therefore, this shows it MUP may help in health but will not change people's drinking habits also.</p>	
2	<p>An Evidence to support efforts to reduce the threat posed by nuclear weapons being successful is in source A which says "IN 1968 NPT was signed which recognised five countries as legally possessing nuclear weapons." This is further supported in source A which says "The [] committed to a process of denuclearisation with a goal of removing all nuclear weapons." This shows that efforts have been made to reduce nuclear weapons and have so far been successful without having any problems. Then source A also says</p>	

ENTER NUMBER OF QUESTION	DO NOT WRITE IN THIS MARGIN

In the new the "Strategic S. TART treaty; the USA and Russia agreed to reduce their number of Strategic war heads. This is important as it shows the aims of reducing warheads are continuing to be met. This is further supported in source B which says 'Successes of the new START deal so far will improve the likelihood of the renewal of the treaty.' This shows that due to successes it can lead to more improvements being made.

Evidence to oppose the efforts to reduce the threat posed by nuclear weapons have been successful because as source A says 'Other countries have continued to develop a nuclear weapons stockpile'. This is further supported in source B which shows the Global nuclear warheads

Stockpile for Russia is the highest with 4500 in 2017 the most recent year. This is important as it ~~shows that~~ would reduce the success of the efforts to reduce nuclear weapons because countries still continue to have a supply of them. Source B also says 'Trump's first address was to totally destroy North Korea.' This is further supported in source A which shows that many people agree the world would be safer without nuclear weapons with 32. This is important as it ~~shows~~ can lead to conflict about what the people of the country want and what the leader of the country wants this therefore reduces the success of the threat posed by nuclear weapons.

Overall, 'efforts to reduce the threat posed by
