45a	<p>In the 7-day creation story, Christians believe that God created the world. From air, land, sea, the moon, the stars, the sun, plants, animals all within the first five days. They also believe God created humans on the sixth day in his image (imago dei). They believe God then rested on the seventh day.</p> <p>In Genesis 2, Adam and Eve were created. In this story, Adam was made from dirt <sup>midway</sup> and Eve was made from Adam's rib. Also, sin was originated from this story as Eve ate the apple from the tree. However, before that Adam and Eve were made and had to live in the Garden of Eden.</p>
45b	<p>Christian literalists believe the Bible word for word. This means they believe the creation stories literally. Some may argue it is reasonable as it is their faith. They also believe to be fully committed to God so they believe it. Also, they believe the Bible is free of errors as God wrote it. They may also argue that everything had to have started with a God as science can't explain the very <del>start</del> <del>beginning</del> beginning of life.</p>

46a. The theory of evolution is a theory which shows development of organisms from the early time of life. It also shows how humans share common ancestors with other organisms. This theory proves that organisms share common ancestors. Also, it has evidence to back it. The survival of the fittest shows how the 'fittest' organisms are still living and going to live. Whereas, the 'unfit' organisms are extinct. This also links to natural selection.	
46b. In my opinion, I think <del>science</del> <sup>SCIENCE</sup> fully explains the origin of life. This is because the theory of evolution has evidence to back it. This theory tells us how organisms have developed from early stages of life on earth. It also tells us how many organisms share common ancestors. The evidence towards the theory of evolution is survival of the fittest. This tells us how the fittest species are still alive and how the unfit ones are extinct. Also, people believe science has stronger views as they have evidence to back them. Whereas, <del>the</del> Christianity only has the Bible, which is seemed to be old and unreliable.

However, some may disagree. This is because they believe in the religious view. For example, Christians believe in the story of Adam and Eve in Genesis 2. This story tells ~~us~~ them how God created life on earth. They believe that Adam was created from dirt (mud/clay) and Eve was created from the rib of Adam. They also believe God said 'let there be...' and there it was. ~~It~~ They also believe God created everything on earth within six days, resting on the seventh. Many Christians believe this in full word for word. This is because they believe as God wrote the Bible, it is free of fault.

In my opinion, I think both science and religion have strong viewpoints. This is because science tells us why and religion tells us how. Science tells us how and religion tells us why.
