(a) For this data, calculate

- the median
- the lower quartile
- the upper quartile.

17 20 20 23 25 27 29 32 38 43 49
 $Q_1 = 20$
 $Q_2 = 27$
 $Q_3 = 38$

2

(b) Construct a boxplot for this set of data.

(An additional grid, if required, can be found on page 17)

2

(c) Calculate the interquartile range for this set of data.

1

$$\frac{38 - 20}{2} = 9 \qquad 38 - 20 = 18$$

In 2016, the interquartile range for the number of passengers who failed to turn up for their flights was 17.

(d) Make one valid comment comparing the number of passengers who failed to turn up for their flights in these two years.

1

In 2017 the consistency of the number of passengers not turning up was greater than in 2016.
