

# Candidate 1 evidence

From:

To: Mark Johnson

Hello Mr. Johnson, this is Viktorija.  
How has your day been? I hope you had a nice day today.

The thing I am meaning to tell you is that there's been a few complaints about the park that is in King Street, it was built about two years ago. And a lot of parents complain about how many injuries happen there.

The swings break, the sand is full of glass pieces, there's no benches for people to sit, there is not enough space there, the sand box is broken, and the road to the park needs to be fixed because there are too many holes.

There's a few possible things that could be there like: a trash bin, a health box so that people could put ~~for~~ the needed things for other people who may not be able to get, a hand sanitizing box.

The town would really appreciate if you would be able to make the park anew and a safe place for everyone! I hope to hear from you again. Have a great day!

In this essay I would like to discuss value of homework in school or college.

Homework have some positive impacts but some have also negative impacts I will try ~~to~~ compare both.

Firstly I ~~would~~ would like to talk about positives, If we have some homework to do then we will memorise more and ~~then~~ then we will re-implement the learning this then can help us when will be test. ~~When~~ If we do homework and we done it correctly then we are more motivated to learn more and more and then we learn self-discipline because then we don't use phone or other things. 1-2 hours a week of homework ~~isn't bad~~ is good because then we have ~~time~~ <sup>time</sup> for us self.

~~Secondly~~ Secondly

Secondly I will talk about negatives, When people do homework then if they do something wrong they are in stress ~~and~~ and then we don't have any more motivation to do this any more and if we have a lot of homework then ~~we~~ we don't have time to help others or even ~~if~~ we don't have free ~~the~~ time. Sometimes when we have a lot of homework and we aren't motivated then ~~we~~ we get lower marks.

Conclusion is many positives and negatives in homework but if we will get 1-2 hours of homework for week then ~~it~~ it will be more positives than negatives. ~~People~~ People will be more motivated and they will remember more but if they will have ~~no~~ more than 1-2 hours for week then they will be stressed unmotivated and they will get less marks.
