

**Candidate 1**Task Number INTRODUCTION

The purpose of the report is to highlight our company cafeteria. These ideas were gathered by means of a staff questionnaire. The results are detailed below:

FINDINGS:

A clear majority thinks that food cafeteria have to be local produce this should be cheaper and the company cafeteria should practice meal deals and low prices. Three quarters would like healthy drinks (such as water, juice without sugar) and healthy

snakes as well (such as salad, tomatoes salad).

- About one employees out of three suggested an International food one day per week.

This proposition should be very attracting and more people could come to eat there.

Twenty nine percent are interested about the International food and these colleagues had never had eaten at <sup>our</sup> cafeteria.

- More than three respondents in four considered that canteen environment is oldfashioned. They proposed more

colour on the tables, on the chairs.

Listening to music during lunch time

should be a good idea as well. During

Summer, on shining day, tables and chairs

should be put outside.

### Conclusion and Recommendations

A large majority will be ready to eat

at the company cafeteria if some new

changes arrive. It should be

interesting if a committee could work

about these suggestions.
