Task Number

1

## Making the cafeteria more popular

### Introduction

The purpose of this report is to give some ideas how to encourage more employees of our company to serve products from our cafe. For this reason, I asked members of the company for their own opinions. The results of this survey are as follows:

### Local food

A significant number of the interviewed workers suggested that cafeteria should provide organic food and drink as:

- local and fresh products
- healthy drinks and snacks

All these members said it will be a good idea to do so because the prices will be certainly ~~be~~ cost a bit less and many of them will ~~be~~ buy from there.

### Different tastes

As many of our workers are foreigners, they

▸ suggested some attractive ideas such as:

- international food
- staff suggestions for recipes/sandwich fillings

They were suggesting <sup>the above</sup> it as they could give the cooker some interesting recipes of food from their own country. Another reason was that they are used to eat more European food than Scottish food. According to it, the number of staff who will have their meals in our cafeteria will increase ~~dramatically~~ <sup>significantly</sup>. Moreover, as they consider the sandwich fillings being a little poor at the moment, they already have some good ideas how to improve it and make them ~~more~~ tastier than are now.

### Canteen environment

The majority of my workmates declared that they are not used to go to the cafeteria because of its atmosphere. They would like some quiet music and even some live music, as many of them are really good at playing and singing music.

## Recommendations

To conclude, I would ~~recc~~ recommend going ahead with the idea of improving the products and the environment in our cafeteria, as this will benefit both <sup>the</sup> employees and <sup>the</sup> employer. It will worth the effort.
