

# Commentary on candidate evidence

## Candidate 6

### Study

The candidate was awarded **13 marks**.

The candidate fully achieves the task. The overall level of the language used is high and has a natural quality which engages the reader resulting in a positive impact. Some limitations in the use of vocabulary and minor errors prevent it from achieving the highest marks but it fully deserves to enter the top band.

### Content and organisation

The candidate follows the points laid out in the rubric and the text has a natural quality with examples to support each point. Overall, the writing is coherent and cohesive throughout and the style and format are wholly effective for an academic essay. There are clearly defined paragraphs which flow logically.

### Vocabulary and spelling

The range of vocabulary is more than sufficient for the task and is employed effectively but falls short of optimum. It would have been nice to see some more complex and detailed vocabulary being used in places.

Spelling is accurate throughout.

### Grammar and punctuation

A good range of grammatical structures is used effectively, with a high level of accuracy.

Punctuation is consistent and mainly appropriate.
