

Shaolin Mosaic: National Level 2; Creating Materials for Display (H22P 72)

A group of four pupils used a light projector to trace original image onto a large sheet of card. Support was provided to colour-code the image, which was then cut into quarters. Each pupil used squares of coloured paper to build their quarter of the mosaic. Finally, the group worked together to decide on the best location for the completed display using a selection of given options. A pin board in the school library was chosen.
