

Vegetable Stand: National Level 2 'Business in Practice'

A group of 5 pupils had been managing a plot at their local allotment as part of their National Level 2 'Managing an Environmental Resource' Unit. With guidance toward suitable prices and shop location, pupils planned, stocked and made a profit from a staff room stall. The backdrop for the shop was created by the same group as part of National Level 2 'Creating Materials for Performance' project and was also used in the school play.
